Please ensure all relevant personnel read the following document.

All elements to be prepared in advance of band load-in time to ensure a smooth-running and enjoyable working environment for all of us. Thank you!

Please also note that not all points are relevant for certain shows. Please disregard where not relevant or contact glenthrower@gmail.com to clarify in advance of show.

Brief

The Alter Eagles are an experienced, authentic Eagles tribute band. Formed in 2003, they perform the whole repertoire of Eagles tracks, from tasteful country rock - complete with full harmonies - through to hard rocking numbers, showcasing the Eagles' trademark duelling electric guitars.

Important notes for Venue FOH Manager. *No strobe lighting will be used in the show.*

Please *do not* place seats directly in front of speakers! Please also advise any audience member near a speaker that the sound could exceed comfortable levels – The Alter Eagles and FOH engineer will not accept liability for damages resulting from this request not being adequately adhered to. FOH engineer will also require a clear path from mixing position to stage.

A minimum of 1 first aider should also be at the venue from load in.

Transport

The band will have a touring party of no more than 8 people: we may also have additional guests/performers with us on certain shows. As such, they should be treated 100% as travel party.

There will be a maximum of 1 Mercedes Vito/Sprinter van and 5 separate cars.

The band require access to load/unload equipment close to the stage door as well as at least 2 safe parking spaces in proximity to the venue (van + 1 car), for use after load in until load out.

Where applicable, please supply a ramp for load-in.

Timings

Where possible we will need a maximum of 1 hour to load in, and an absolute minimum of 2 hours to soundcheck. If the band are playing a festival slot, a minimum 30-minute changeover is required where the band will need all monitor lines accommodated and checked before the performance can commence.

Stage Requirements

We will require the unobstructed use of the entirety of the venue's stage space. The stage will need to be safe, clear, clean and dry prior to load in.

If the stage is big enough and you have them available, please supply the following risers:

1x Drum riser - 8ft x 10ft on 2ft legs (if rolling it must have sufficient brakes to hold it still)

1x Keyboard riser - 8ft x 10ft on 2ft legs (if rolling it must have sufficient brakes to hold it still)

Please refer to stage plot for positioning.

Power Requirements

Minimum power to be accessible from load in on stage and at FOH position of the following: -

FOH: 2x 13A **Stage:** 4x 13A

Please ensure that all audio and backline power are running from the same isolated supply independent of any lighting or domestic circuits.

If any sockets are accessible from the audience, tape will be used to cover up the socket in case some decides to charge their phone.

Backdrop

The Alter Eagles will need to be able to hang/fly a banner sizing 19ft x 10ft / 5.8m x 3.1m.

Backline

The Alter Eagles will provide all backline unless previously discussed with the venue. This backline is for the sole use of the band members. If backline is being provided the band will bring breakables and some backline (please discuss prior to show)

Touring Audio Equipment

The Alter Eagles will **always** tour with their own FOH engineer running monitors and FOH.

FOH mix position will need to be at the centre of the stereo image, on the ground floor and with a clear path to the stage. The area around mixing position must be unobstructed and protected against audience members.

The band are currently touring with the following equipment. Please note all equipment is for the sole use of the band unless agreed prior to the show:

1x Behringer X32 Desk

1x Behringer S32 StageBox

1x 100m Cat 5e Cable (on reel)

2x HK Audio Linear L5 112 Mid/Top Speaker

2x HK Audio Linear L Sub 1200A Active Sub

2x HK Audio Linear L Sub 1200A Passive Sub

1x Wireless IEM

2x Wired IEM

4x LD System Mon12a Monitor Wedges

1x DI Rack (And various boxes for use with all band instruments)

Microphone Package for all band inputs

XLR/Jack/13a Cables enough for band setup

Microphone stand package enough for band setup

If the band are using the venue's FOH PA System

We require a professional quality STEREO P.A. system of adequate size and power to guarantee fully consistent sound throughout the venue. The system should comfortably provide a full spectrum of clear, undistorted audio.

The PA system must have appropriate processing to protect from any unintentional or accidental peaks or excesses in audio level, with no liability or responsibility held by the FOH engineer or The Alter Eagles for damages resulting from this request not being adequately adhered to.

All our Equipment is P.A.T tested, and we have public liability insurance
(Please contact us by email if you would like a copy of either of these certificates)

Lights

The Alter Eagles do not currently tour with a Lighting Engineer.

If lighting is being provided by the venue then please provide sufficient lighting for the stage and a competent, sober and English-speaking engineer who is well versed with the equipment and production methods used within the venue.

Due to the variety of venues we play, below is a general lighting plan which can be adapted to fit the configuration and inventory of each venue. Please check the stage plot for positioning.

- *Ideally the banner will stay the same (red/white) throughout the show.*
- *Side and stage lights will be the colours suggested in setlist (Provided on day of show).*
- *A front wash for the singers at the front is also suggested.*
- *At times it may be ideal to use a spot on the positions.*
- *All members of the band should be lit*

The TM will cue lights and give colour schemes for each song based on the above.

If possible a 2-way working communication unit will be required at lighting position and FOH position.

Merchandise

The Alter Eagles may sell CDs after the show in the bar area or in front of the stage after the show, they will advertise this during the show. Please liaise with the band on the day to finalise any relevant details.

Hospitality

Every venue is different but please provide at least 1 dressing room with air conditioning/heating or area for the band to change.

Minimum Band Rider

- 12 bottles of drinking water – for use backstage and onstage
- Tea and coffee is naturally always appreciated but this is not essential.
- 7 half-time drinks from the bar ready and waiting in the dressing room is also always appreciated (we'll place an order before the show)

Where there are no catering/restaurant facilities within the venue, please supply the TM with the following prior to the event;

- Location of near-by pub, accessible via walking.
- Location of near-by restaurant serving a variety of meat and vegetarian meals.
- If the above is not applicable, please supply take-away options upon arrival
